Paper into Microsoft SharePoint done right

SharePoint document management solutions from Kodak and Atalasoft

SharePoint is a great answer for comprehensive enterprise content management of Microsoft Office documents. Now SharePoint can accelerate shared business practices of your paper documents with document imaging solutions from Kodak and Atalasoft.

Simple, fast, cost-effective paper capture from Kodak

Capture products and solutions from Kodak help you get paper documents into SharePoint from anywhere, anytime—the *right* way.

- > Easy to learn, use and convert documents into images and data that can be indexed and viewed in SharePoint
- > Automated processes reduce scanning and indexing time
- > High-quality images time-after-time without the need for additional imaging software eliminates need for time-consuming rescans and greatly reduces errors
- > Capture, index and send documents to SharePoint from desktop, networked, and high-volume scanners. Even MFPs!

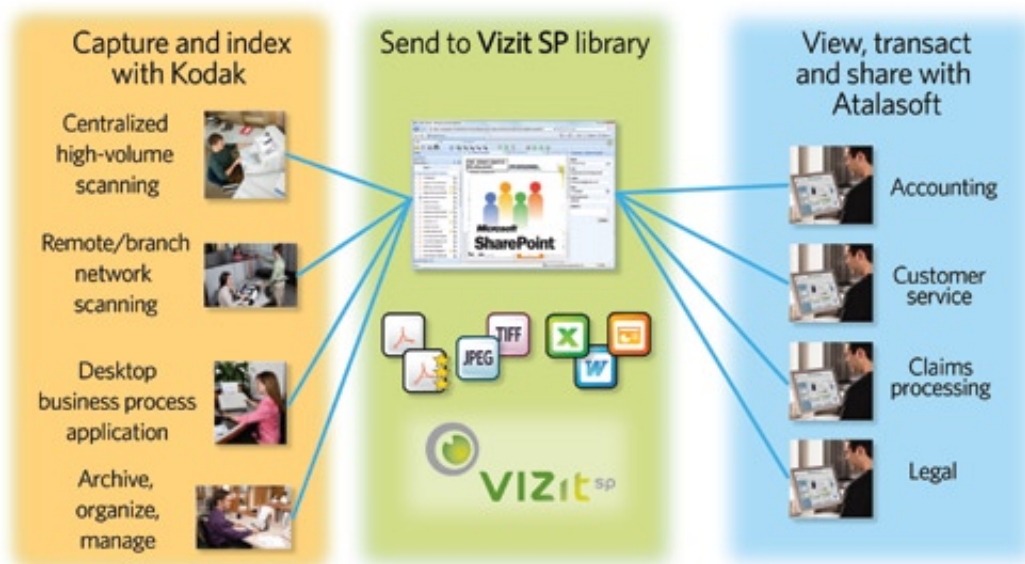

SharePoint document management with Vizit SP from Atalasoft

View, search, and manage all SharePoint document types with Vizit SP. Turn SharePoint into your newest, most efficient and cost-effective document image management platform.

- > See a thumbnail preview of every document
- > View full-size documents in a browser-based viewer that requires no software installation

How it all works together ... beautifully

Paper into **Microsoft SharePoint** done right
